

Channel LSC

Description

Students in Year 10 will be able to participate in a subject which allows students to develop skills in ICT and Media as well as presenting, acting, marketing, creativity, critical thinking, problem solving and reasoning whilst producing an LSC TV program.

This subject creates ongoing digital and print media which will allow students to collaborate creating podcasts which will be used within the school and online, to celebrate achievement. In this subject students use and learn about technology.

When there are other special events occurring like the cross country or guest speakers, students will be producing special newscasts that can be linked to our website.

Skill Development

Presenting, editing, acting, marketing, creativity, critical thinking, problem solving and reasoning.
